

## Work Experience

### Interactive Developer, The Basement

June 2017 - Present

- Led and architected the front-end on an Ember application for client to recreate their eyeglass quiz with the addition of a frame builder tool.
- Create and maintain websites integrated with CMS technologies, such as WordPress and Sitefinity, for our own agency, RCA Lights, and IEDC (Indiana Economic Development Corporation).
- Create small and large scale ad campaigns for various clients utilizing JavaScript build tools and Greensock.
- Collaborated with designers to improve design and development processes.

### Interactive Developer, Bradley and Montgomery (BaM)

May 2013 - February 2017

- Created HTML5 animations using Greensock and create web applications using Node.js.
- Modified and updated websites like Modern.IE, TryOutlook.com using Visual Studio and GitHub.
- Maintained websites like Microsoft.AdsinApps.com using Jekyll, Gulp, Ruby, Sass and SMACSS.
- Completed quality assurance testing and bug fixing on pre-launch sites such as Microsoft Production Studios.

### Web Developer, Springboard Marketing and Web Design

August 2012 - April 2013

- Designed wireframes using Balsalmiq for first phase of design process.
- Created front page and inner page design mockups using Photoshop for second phase of design process.
- Developed custom WordPress themes from scratch using HTML, CSS, PHP, and jQuery.

### Web Developer, Indy IT Professionals

May 2011 - March 2012

- Designed logos using Illustrator in a variety of formats to be used on digital and print materials.
- Altered WordPress themes to fit unique client needs.
- Created site architecture and completed content migration.

### Graphic Design Intern, Roundpeg

June 2010 - December 2010

- Created graphics for use in web and print applications, including logos, business cards, postcards, and web buttons.
- Designed and programmed small scale websites for clients in WordPress.
